# Teacher supply goes from glut to scarcity in a few short years

**The mounting teacher shortages in parts of Canada have several sources, including working conditions, cuts to teacher education programs and a lack of specialty instructors.**

BY MOIRA MACDONALD | JAN 09 2019

It's a situation that was rarely seen in Ontario only a few years ago, due to a glut of teacher education graduates that also existed to varying degrees elsewhere in Canada. That trend has quickly reversed. First-year teacher unemployment in Ontario **dropped** from 38 percent in 2013 to 14 percent by 2017 and is "well into the single digits" this year, says Frank McIntyre, a research consultant to the Ontario College of Teachers.
